Levi Nauwelaerts

EDUCATION

Thomas More
September 2019- Present
Bachelor Applied Artificial Intelligence.

UC Leuven-Limburg
September 2017 – June 2019
Applied Informatics, my current course. I follow a lot of extra seminars as well as compete in some programming competitions.

Santa Maria Instituut Aarshot
January 2016 – June 2017
I did the option IT & networks, really liked it. Did fine catching up in the C++, business and networking courses. I only would have preferred more hours of mathematics.
WORK EXPERIENCE

Share Bvba Trainee
April – 2017
I ran trainee in a local consultant for 14 days as part of my education. My job mostly consisted of fixing network issues at clients their offices and coming up with solutions for problems they may have/ things they could improve.

Did also some **freelancing** jobs across the years which vary from fixing software/hardware & network issues till making the logo's of local businesses around me.

SKILLS

Skill	Level
Teamwork	75%
Creative problem solving	95%
Programming	70%
Driven	65%
Flexible	60%

STUDENT – COMPUTER SCIENCE

PROFIEL

I am a very curious, creative person. I firmly believe understanding the basis of all fields is a good start point for me to be able to work in varied teams, as well as my unique look onto issues.
I am a perfectionist and I will work on a project as long as it takes to make it feel just right.

EXTRA PROJECTS

Engie – Weekend Challenge Paris
From 14-16 march 2019 I participated in an international weekend challenge where we in groups of 4-5 students had to come up with an concept and a pitch and demo for it. Based on the demands of the French company Engie. My group ended 3th.

Flemish programming Competition
In 2018 I participated using the Java language.
In 2019 I participated using the Python language

International Project – Kolding
7-12 April 2019
I participated in an international project situated in Kolding. Were we in a group of 4 spend a week long designing and presenting a prototype for a digital solution for a company. Here we got the 1st prize in the competition.

SKILLS

Programming languages

C++ - Good
C - Average
Python – Average
Css – Average
Html – Average
JavaScript – Average
Lua – messed around in it for a few days

Languages
Dutch written – Native
Dutch spoken – Native
English written – Really good
English spoken – Really good
French written – Bare able
French spoken – Bare able

PROJECTS

Website + php form
Did this as part of my high school gip, used bootstrap as a mainframe and followed online documentation / information to get myself started at a php form with basic functions. Sadly it broke about a year after and I never got around to fix it

Secret Sound Escape
Also part of my high school gip, I worked together with 3 other students to develop an interactive GPS app, written in C++ based on the Esenthel engine. On demand of "Musica" en "de Pianofabriek". App plays merging sounds based on your location in a park in Brussels, can still be downloaded and used.

HOBBY'S

I play a tabletop rpg with a group of people every so often, and play card games in a local game store. Play music in ensemble. Participate in HEMA (sword fighting) in a team.
And I manage a pretty large online community in which we speak over VOIP on a daily basis. We count about 150+ heads and debate about anything & everything. Sometimes while playing games together. Recently I picked up the hobby of wall climbing.
